

1st Half 2021 Financial News on the New Dream of Cambodian Children Organization

The last 18 months have been especially difficult for the NDCCO school, its staff, volunteers, students, their families and their communities. Cambodia relies heavily on tourism and without visiting tourists, most families are struggling for money and food. Finding money, not just to keep the school going, but to help feed the students, their families, as well as the poorest and most vulnerable within their communities, has been an enormous problem this last year and a half.

Although times have been challenging, the NDCCO would like to make a massive thank you to everyone out there across the world, thinking of us, encouraging us, and of course donating to help the school survive. An amazing **\$13,200** has been donated in this 1st half of 2021, from 56 separate donations and from over 20 generous donors from all over the world, such as Australia, America, Belgium, Brunei, Germany and the UK to name a few. Thank you, thank, THANK YOU! Your donations **DO** make a difference, as there are no administration costs, and your money all goes directly to your stated project. You will see on the NDCCO Facebook page how your donations are helping the lives of so many, so thank you from the bottom of our hearts!

To give you an idea of what these donations have been used for, these are the cost codes used in the Accounts Summary.

Education Program (code 100) -	Direct costs attributable to providing education to the children such as teachers salaries.
Food Program (code 200) -	These are costs for providing meals to the children at the school or food for the children to take away during COVID.
Community Program (code 300) -	These are costs for providing community support: such as help with food & health care to the families of the school children or the local communities.
Operation (code 400) -	These are direct costs essential for running the school such as electricity, Wifi, water supply, and educational material.
Donations (code 800) -	Money donated to the school, or through the organization for specific individuals, groups or families.

But to summarise the donations for Jan to June 2021 has been spent as follows;-

100 - Education Program	\$1740
200 - Food Program	\$2454.08
300 - Community Program	\$3711.89
400 – Operation	\$5450.05

A breakdown summary of the accounts are available here for each month.

[January 2021](#)

[February 2021](#)

[March 2021](#)

[April 2021](#)

[May 2021](#)

[June 2021](#)

Unfortunately, this global pandemic is far from over and although the number of cases and deaths in Cambodia are falling, it looks unlikely that tourists will return before the beginning of 2022. That will have been 2 years of increased unemployment and increased poverty and food shortages for many. We at the NDCCO hope and pray that your generosity, care and understanding will continue as much as possible until the organisation can once again stand on its own two feet.

Thank you
